The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Von Unge, WO 97/02261 cited by applicants.

It discloses a method for the optical purification of the single enantiomers of lansaprazole. See p. 1, especially lines 22-25 and EX. 11 and 12. The compounds are used to treat ulcers. See p. 1. The patent discloses at p. 2, lines 10-18 that single enantiomers of pharmacologically active compounds often have improved pharmacokinetic and biological properties.

Thus, the use of the optically pure S(-) enantiomer of Ex. 11 to treat ulcers and other digestive problems caused by increased gastric secretion would have been obvious to one of ordinary skill in the art.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Larsson et al, WO 96/02535 cited by applicants.

Art Unit: 1625

It discloses a method of producing the S(-) enantiomer of lansoprazole in Ex. 21. It also discloses the use of same in inhibiting gastric secretion. See pg. 1.
